About the team

Deloitte's Value Advisory team specializes in solving complex business and transaction issues, including analyzing valuation alternatives and recommending solutions. Our main areas of focus are:

- Business valuations;
- Damage quantification;
- Valuations related to financial statements;
- Mergers, acquisitions, and divestitures;
- Strategic and financial consulting; and
- Financial modeling.

Permanent Analysts within Financial Advisory join our two-year Quick Start development program. Through Quick Start, analysts receive up-front training covering key topics from across our Financial Advisory practice, including advisory and technical skills, quality/risk processes, engagement lifecycle, and project management principles. Once the training is

complete, our analysts are deployed on client engagements, proposals, and strategic initiatives. A CPA stream is available for analysts who need to obtain working hours for their designation.

The objective of our Quick Start program is to provide analysts with exposure to a broad range of engagements, projects, and initiatives from across all service lines within our Financial Advisory practice. By developing core skills across multiple dimensions, the program aims to assist our analysts in building their careers as future advisors and agile leaders.

They provide common ground to unite us across cultures and geographies. They help us to earn the trust and respect of our stakeholders. We all commit to living by these shared values, to stay true to the principles they represent, and to honour the legacy from which they came. They are what sets us apart and makes us Deloitte.
